

## TECHNICAL SERVICE BULLETIN

---

To: Minuteman Dealers and Service Centers

From: Minuteman Technical Support

Date: 12/30/2010

Subject: TSB MIN-11061 - New serial number format and model identification labels

---

### **Reason for Change**

New serial number format and model labels for easier product identification.

### **Improvement**

Machines will have the complete model number for easier identification, when looking up replacement parts and finding out the age of the machine.

---

### **Models/Serial Numbers Affected**

All models except for those that are currently using metal serial number plates.  
Some examples of machines with metal serial plates are: Explosion Proof Vacuums, E24QP, E26QP, E28QP, E30QP, E33QP.

Effective date September 1, 2010

### **For Reference Only** –

The serial number example: 10120405

The first two digits of the serial number will be the year and the third and fourth digit is the month.

The number 10 is the year 2010. The number 12 is the month of December

The fifth through the eight digits 0405 will be a unique number for each machine.

**See the picture on the next page.**
