

TECHNICAL SERVICE BULLETIN

To: All Dealers and Service Centers

From: Power Boss Technical Support

Date: 5/20/2010

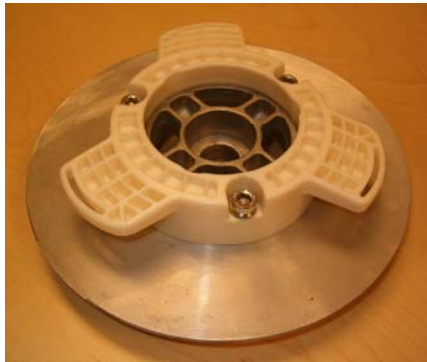

Subject: TSB for ECN # HA09-0507 - New Drive Hub Kit Part Number K-E1720HUB

Reason for Change New and improved

Models/Serial Numbers Affected- All Phoenix 20 and Phoenix 22 with disk brush decks. The disk models will be equipped with the new hubs from the factory. They will be installed on machines with serial numbers starting with the letter "E".

Instructions – The original style disk brushes that used the black tri-lobe hub system will no longer be available. When ordering replacement brushes or pad driver listed below, the drive hub kit (**K-E1720HUB**) will be needed.

Note - Power Boss will warranty the first replacement hub per machine, when a warranty claim has been filed.

New Style Hub

New style clutch plate***

New style brushes and pad holders will be required for this change.

They will be sold separately. See below

Brushes and Pad Holders
